

SOLUTIONS FOR CONSTRUCTION

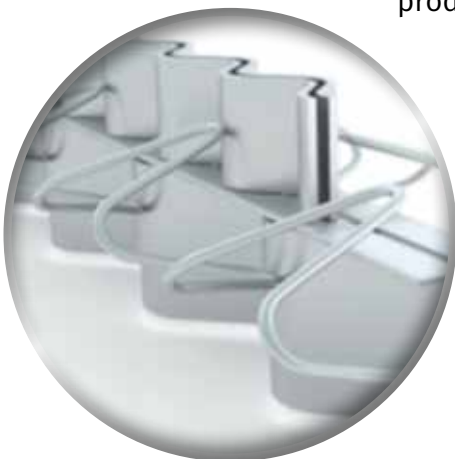

SEMTU is a technical distributor in construction business. We are active in Finland, Estonia and Latvia. Our goal is to develop and deliver innovative products and solutions for concrete and construction industry.

We are specialized in concrete structure products. Our product range covers chemicals, sealants, fixing-, lifting and reinforcing products, concrete laboratory equipment and machinery for concrete production. We deliver adhesives, such as white and aluminate cement and microsilica.

OUR ROOTS lie deep in the Finnish history. Semtu was founded in 1942 to provide materials for wartime concrete manufacturers. Sementtivalimoiden Tukku, later Semtu, was strongly involved in rebuilding and developing the Finnish concrete industry.

The name Semtu was implemented officially in 1967. Even though the name changed, our mission remained the same; to supply our customers with products they need and bring new solutions for their production.

WE EVOLVE constantly and keep track of global innovations in the construction sector. We work hard to identify top-quality solutions with best cost-efficiency. Our customers' needs shape actively our product and service range.

We want to listen and support our customers and pave their way for success. Together we build a more functional and productive environment.

OUR VALUES guide us. Sustainable development is important to us. We observe strict quality and environmental regulations in our operation and expect our suppliers to do the same.

As our customer, Semtu's qualified experts, logistics know-how and worldwide network of suppliers are at your disposal. All these together enable your company high-quality solutions and prompt deliveries. Swiftness, flexibility and transparency are our cornerstones, which we rely on.

OUR PRODUCT RANGE includes premium solutions for various sectors of construction. Our core competence are products for concrete construction.
